

To retrieve the data from the database:

```

package in.sp.Select;

import java.sql.Connection;
import java.sql.DriverManager;
import java.sql.PreparedStatement;
import java.sql.ResultSet;

public class SelectDemo
{
    public static void main(String args[])throws Exception
    {
        Class.forName("com.mysql.cj.jdbc.Driver");

        //Create Connection
        Connection
con=DriverManager.getConnection("jdbc:mysql://localhost:3306/jdbc_db","root","root");

        //--Create Statement
        PreparedStatement ps = con.prepareStatement("select *from register");
        ResultSet rs=ps.executeQuery();
        while(rs.next())
        {
            System.out.println("Name :"+rs.getString("name"));
            System.out.println("Email :"+rs.getString("email"));
            System.out.println("Password :"+rs.getString("password"));
            System.out.println("Gender :"+rs.getString("gender"));
            System.out.println("City :"+rs.getString("city"));
            System.out.println("-----");
        }
    }
}

```

```
        con.close();  
    }  
}
```

OUTPUT:

```
Name :Pranjali
